

Technical Services

Technical Services

CorLa is structured specifically to deliver a full range of independent management services for PFI and PPP projects. CorLa is founded on a team of professionals with a wide range of PFI skills and an impressive track record of delivery.

Within this service offering, CorLa includes Independent Certification and Technical Support.

CorLa offers a truly multidisciplinary bespoke approach to each project, having indepth experience in the design, development, construction and operation of a wide range of PFI and PPP projects.

Howard Winfield, as Head of Technical Services, has a proven track record in the Independent Certification of over 15 blue chip PFI projects.

Our experience is particularly strong in the Health and Education Sectors. CorLa is able to provide an indepth service through a team of highly motivated professionals for the management of your project.

In the last five years, 10 hospital projects benefiting from our services have been handed over early or on time. The common factors to all these projects are their complexity, speed of construction and demanding output-based service specifications.

West Middlesex Hospital

Each project demands the same high levels of expertise, focus and process management to meet the challenging targets and expectations of users and investors alike.

CorLa delivers these inputs to bring about successful projects.
