

Environmental Policy Statement

The Board of Directors of CorLa Ltd (“CorLa” hereafter) recognises the overall need to protect the environment within its activities and the need to influence in this respect of those parties within the BSF and PFI processes/projects.

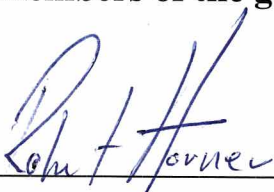

CorLa is committed to the prevention of pollution and continual improvement in its environmental performance. The Environmental Management System meets or exceeds the requirements of BS EN ISO 14001:2004.

CorLa has identified applicable legal requirements relating to its environmental aspects in order to minimise its impact on the environment.

CorLa has established key objectives and targets for the Environmental Management System; these are monitored and reviewed continuously.

The Environmental Management System is documented and maintained and the Environmental Policy is communicated to all staff and those others working on behalf of CorLa, and it is made available to all interested parties including members of the general public via the company’s website.
